

AIRSIS Express™ Trailer Tracker

A simple, reliable and affordable solution that tracks and monitors your entire trailer fleet 7/24 from anywhere through satellite communications and the Internet.

AIRSIS Express is a totally integrated, battery-operated unit that can be mounted anywhere on a trailer and start tracking in minutes. There is no need for external power, wiring harnesses or antennas. It has a battery life of 3-7 years with no maintenance required. It works in rugged environments with a NEMA 4X sealed enclosure that is intrinsically safe and J1455-compliant.

AIRSIS Vision Service

Asset tracking and monitoring is achieved through our Web-based AIRSIS Vision service, where you have your own secured web site accessible 7 x 24 from anywhere in the world. AIRSIS Vision enables you to:

- View the location of your entire fleet at a glance, from a national map-level to street-level detail.
- View location history and status reports.
- Receive e-mail and SMS alerts for customer-defined events.
- Provide password-protected access to your customers, partners and service providers.
- Integrate fleet data with your backend systems.

AIRSIS Vision service includes satellite airtime, Web hosting and technical support—it's one integrated solution.

AIRSIS Express is ideally suited for customers who want basic tracking functions with 1-4 reports per day. Motion alerts, geofencing and external sensor support are also available.

High ROI

This AIRSIS solution delivers multiple benefits that add up to high ROI:

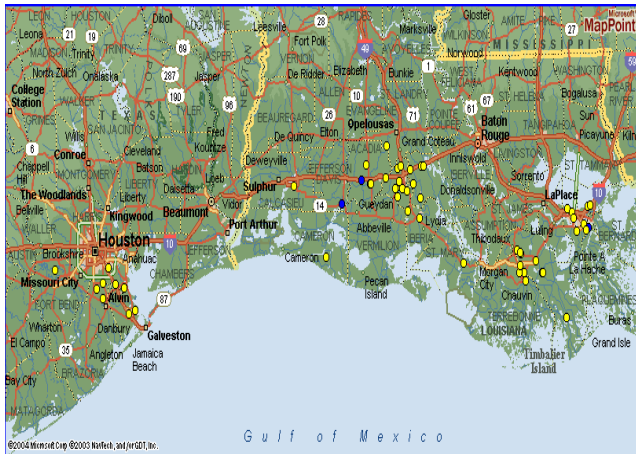

- Increases equipment and driver utilization.
- Reduces fuel cost and down time by eliminating yard checks.
- Protects against theft and locates lost assets.
- Reduces tractor to trailer ratio.
- Improves customer service.
- Reduces insurance premiums.

Bottom line, it all adds up to reduced cost, increased revenues, enhanced customer service and a peace of mind.

Reliable Global Coverage

AIRSIS Express communicates via a global satellite network that has complete coverage in North America and many parts of the world. The network typically delivers a report in seconds with a 99% success rate.

KEY FEATURES

AIRSIS Express has a set of basic features that are easily programmed into your application:

- Wake, locate, transmit, sleep.
- Change transmit intervals based on start/stop status, alarm conditions or location.
- Up to 12 programmable interval settings.
- Programmable geofence zones.

Call us so we can program the features to suit your needs.

TECHNICAL SPECIFICATIONS

Data Interfaces RS232, 4 dry contact inputs

Communications
 Transmit frequency 1610-1620 MHz
 Transmit power 0.5 amps
 Transmit reliability 99%

Power
 Source Internal battery
 Battery life 3-7 years (depending on transmits/day)
 Battery replacement Yes

Physical & Environmental
 Size 9.25" x 6.25" x 1"
 Operating temperature -40 to +85 C
 Packaging NEMA4X & SAE J1455 compliant, intrinsically safe—Class 1, Division 1.

Installation
 Mount anywhere with full view of sky via industrial adhesives or screw mount.
